The following is an examiner's statement of reasons for allowance: Applicant's traverse of the rejection based on Moritan is noted. It is agreed that Moritan does not teach nor suggest the claim provision of an oil outflow prevention unit installed at an inner side of the oil inlet preventing the oil from flowing out through the oil inlet but allowing an outflow of air bubbles generated due to gasification of the oil, while the shaft is rotated. The filter of Moritan is not located at an inner side of the oil inlet as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
